

Where other crops whisper, Yalos™ treated crops roar!

Yalos™

Inoculant

What is Yalos™ Inoculant

Yalos™ represents a groundbreaking inoculant for winter wheat, effectively enhancing both yield and profitability by optimizing nutrient availability and uptake. Its unique formulation ensures consistent performance, as it mitigates environmental stress while improving suboptimal areas of fields.

Why Use Yalos?

Increased production

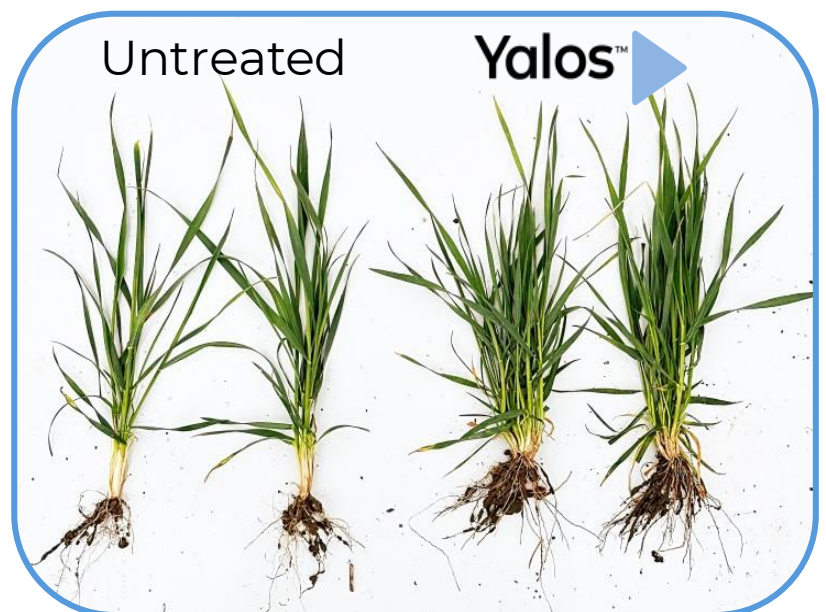

Early Vigor & Biomass

Increased nutrient availability & usage

Yalos™ improves yield, germination & biomass.

Yalos™ performs significantly better than industry bio-inoculant benchmarks

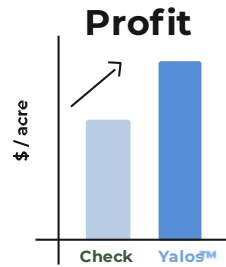

What yield and profitability can I expect?

Yield:

Yalos™ outyielded the untreated control by 4 Bushels per acre on average.

Profit Potential:

Based on expected results Yalos™ returns 4-1 on average

Scan the QR code, for grower testimonials and additional trial data – and to be first to know news about Yalos™

How does Yalos™ work?

Yalos™ takes advantage of a **combination of two microbes** improving nutrient availability and efficiency, Improving yield and profitability.

Enhances plant defense

Supports early plant growth & root branching.

Increases phosphate, sulfur & iron availability

Improves microbe establishment in the root zone
